For over 35 years,
Effe has been designing
and manufacturing
saunas and Turkish baths
with state-of-the-art
technology

TEMPERATURE 95°F > 118°F

HUMIDITY 90% > 100%

Effe is central to a story that starts with tradition and stretches right into the most innovative future. This is a story of wellbeing, of the ancient traditions of the sauna and the Turkish bath that today's advanced technology and design excellence have clothed in a new guise. This evolution has been made possible by our company that, since 1987, has focused entirely on this sector and we are proud to offer saunas and Turkish baths that are 100% Italian, from design to manufacture.

This philosophy has enabled Effe to become the well-deserved leader in our field, winning the trust of our customers the world over. One of our strong points is the excellence of our high-tech solutions, always in the vanguard of progress with long-lasting, energy-saving products of certified quality, requiring very little maintenance.

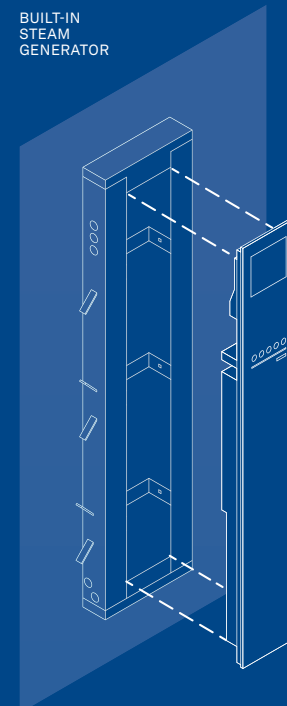

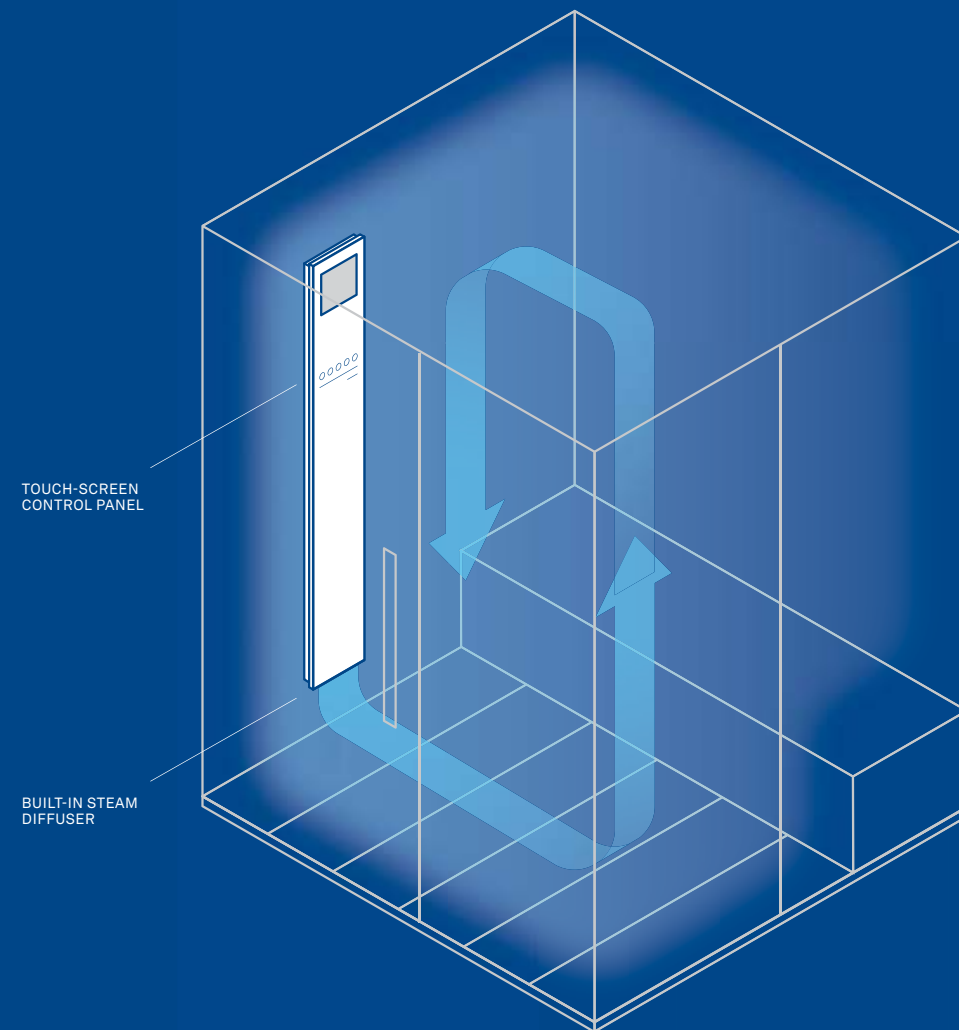

In addition to our constant quest for high performance and practicality, we at Effe are fully aware that feeling good equates to looking good and so we take just as much care over aesthetics. Our saunas and Turkish baths feature clean lines traced by such famous designers, often with generous expanses of glass that transform them into stylish items of furniture. We use only eco-friendly materials and the wood is always top quality from reliable sources that do not cause deforestation or endanger rare trees under threat. Effe's extraordinary know-how translates into precise made-to-measure solutions.

INTERNAL STEAM GENERATORS

These compact, stylish steam generators are fitted with a backlit touch-screen control panel and are designed to be visible inside the Hammam.

EASY TO INSTALL

Effe supplies a perfectly designed outer casing for quick connection to the water and electrical mains.

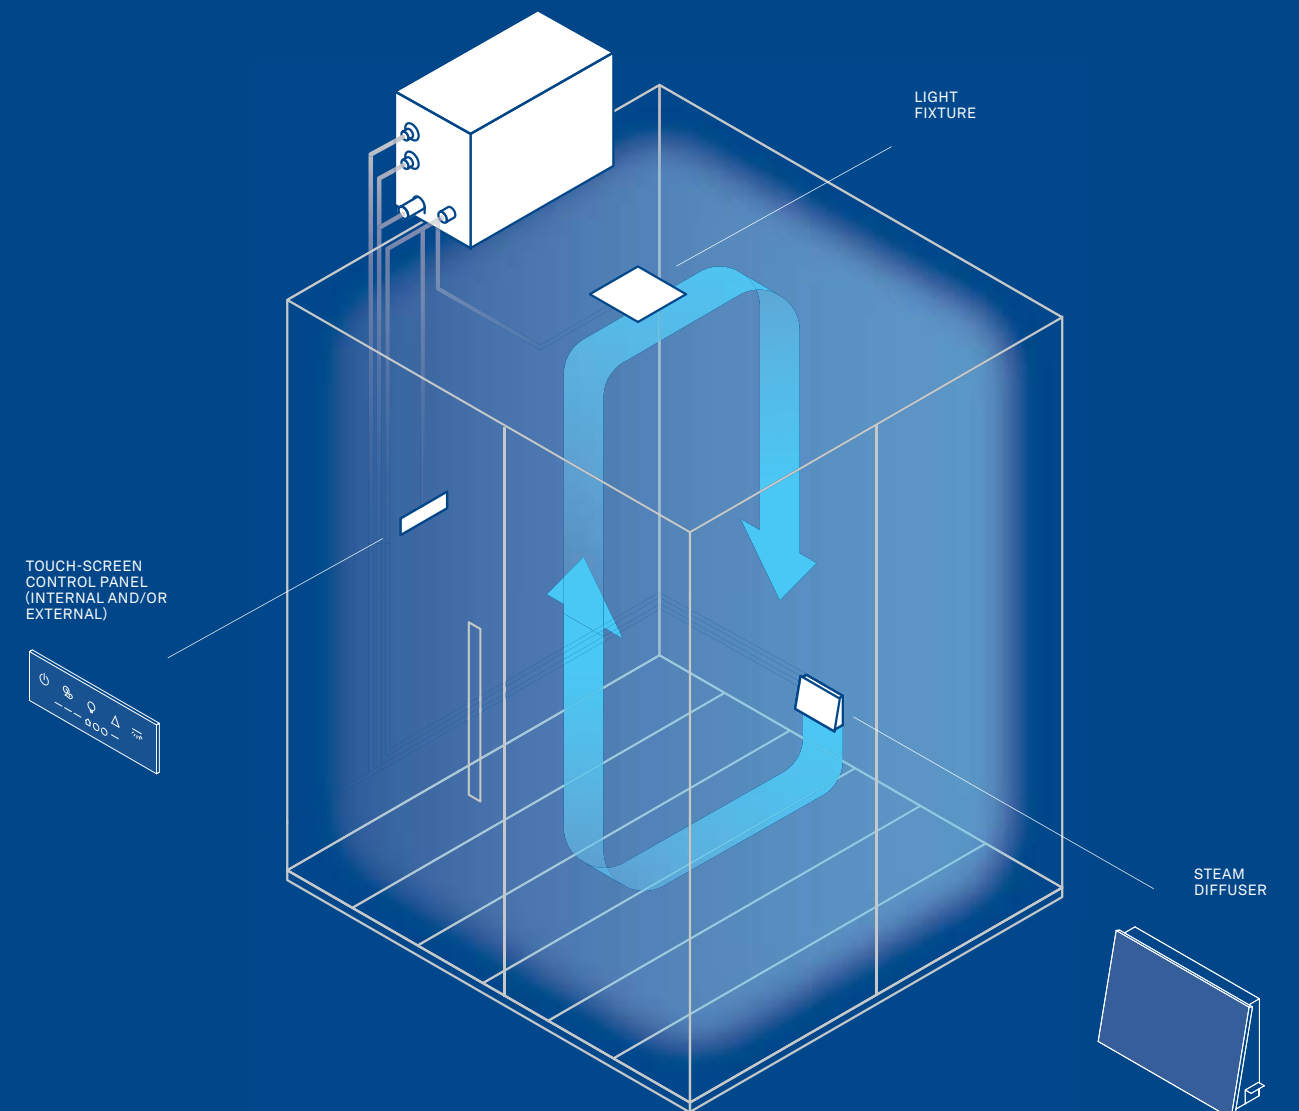

EXTERNAL STEAM GENERATORS

These steam generators are designed to be placed in a utility space outside the Hammam. The functions are controlled on a separate control panel.

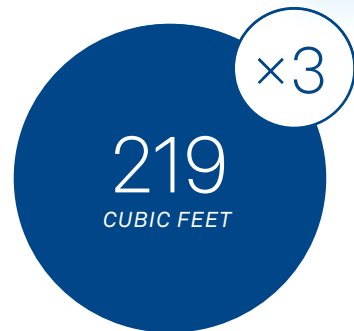

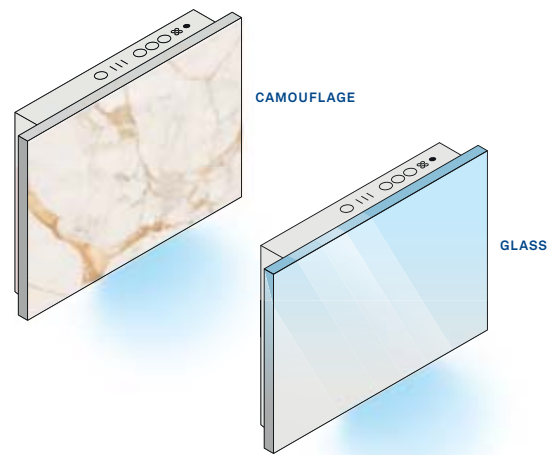

MORE POWER

The external steam generator enables more power to be used in very large spaces.

ENJOY PERFECT STEAM IN COMPLETE SILENCE

Relaxing in a steam bath surrounded by nothing but silence is a luxury only Effe can guarantee: our technologies ensure optimal steam density, while keeping noise to an absolute minimum.

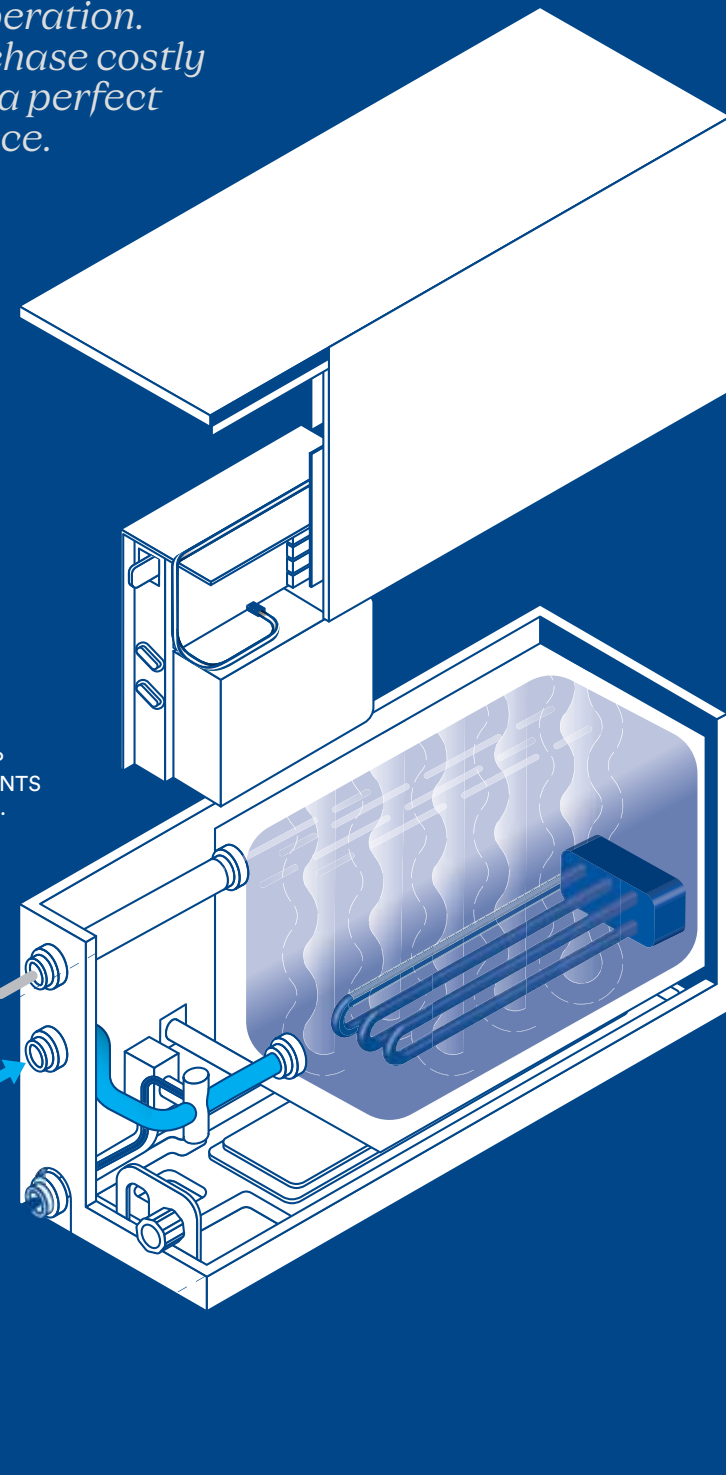

ALL-INCLUSIVE PRODUCTS

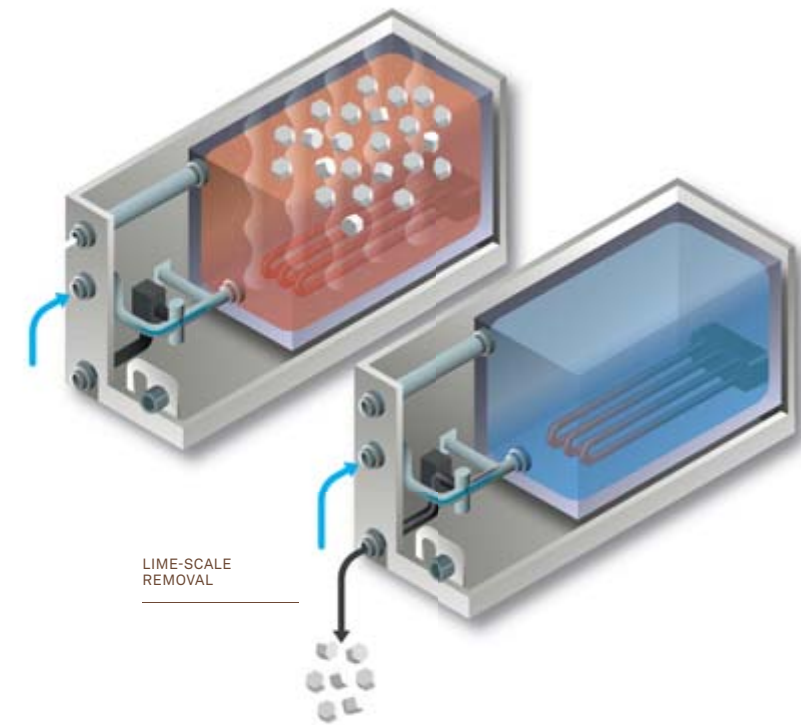

Effe steam generators are supplied with all the accessories required for complete operation. No need to purchase costly extras to enjoy a perfect steam experience.

THE GENERATOR INCLUDES A DRIP PAN THAT PREVENTS WATER LEAKAGE.

THE WIFI CONNECTION MODULE (ECC EFFE COMFORT CONTROL) IS FITTED INSIDE THE EFFE GENERATORS TO PRESERVE THE ROOM'S DESIGN. IT COMES AS STANDARD ON ALL EFFE MODELS EXCEPT INSIDE.

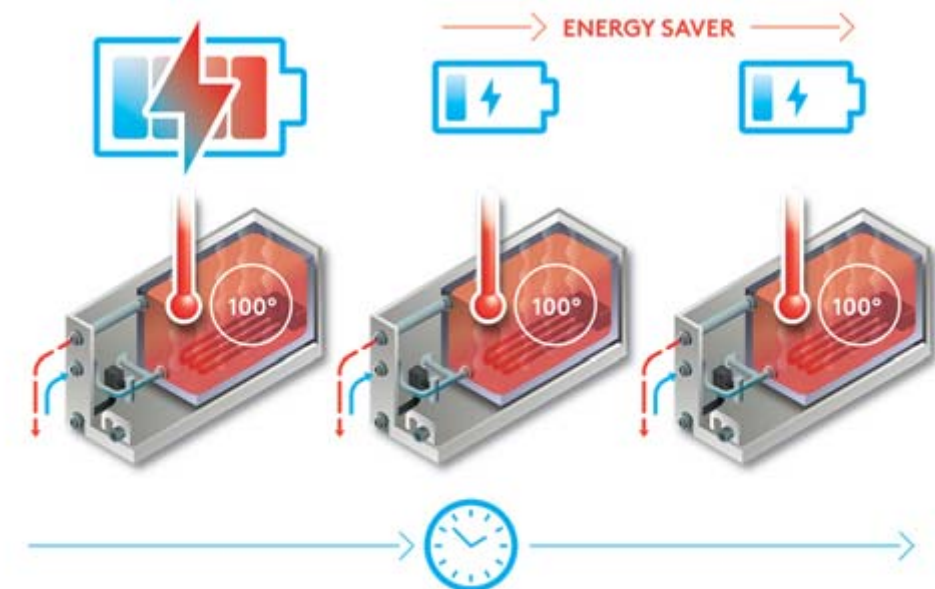

LIME-SCALE REMOVAL

ENERGY SAVER FUNCTION: INCLUDED!
THIS EXCLUSIVE EFFE TECHNOLOGY OPTIMIZES ENERGY CONSUMPTION AND IS ALWAYS INCLUDED AS STANDARD.

EACH EFFE STEAM GENERATOR HAS AN ENERGY SAVER FUNCTION. THE MAXIMUM POWER OF THE GENERATOR IS USED TO BRING THE WATER TO BOILING POINT AND REACH THE SET TEMPERATURE. WHILE IT IS FUNCTIONING THE ENERGY INPUT IS REDUCED TO A HALF OR A THIRD, DEPENDING ON THE MODEL, WHILE KEEPING THE STEAM FLOW CONSTANT.

AUTOMATIC BOILER CLEANING SYSTEM: INCLUDED!
FORGET THE INEFFICIENT AND COSTLY "AUTOFLUSH" SYSTEM, WHICH ONLY DRAINS WATER. EFFE INTRODUCES AN AUTOMATIC CLEANING SYSTEM THAT REDUCES MAINTENANCE AND ENSURES SUPERIOR HYGIENE.

EXCLUSIVE EFFE TECHNOLOGY HAS PRODUCED A UNIQUE SYSTEM WITHOUT MECHANICAL FILTERS ON THE GENERATORS AND NO NEED FOR FREQUENT MAINTENANCE. ALL THE BOILERS ARE STAINLESS STEEL AND A SOPHISTICATED SYSTEM FILLS AND EMPTIES THE BOILER WITH CLEAN COLD WATER EVERY TIME IT IS USED. THIS NOTABLY REDUCES THE NEED FOR CLEANING AND MAINTENANCE, AS WELL AS ENSURING THE INTERIOR ENVIRONMENT IS PERFECTLY HYGIENIC.

Effe boilers perform regular washing cycles that remove all impurities from the water to ensure steam is pure, light and healthy to breathe.

WE CARE ABOUT DESIGN

Effe steam generators can be installed inside the Hammam, so their design takes on a new dimension, with the utmost attention to detail taken. The luxurious surfaces are designed to blend in with any interiors. The stylish backlit touch-screen controls are intuitive to use and can always be seen through the steam.

HEAT TREATMENTS: ENDLESS BENEFITS

Over the past years, scientific research has clearly shown that passive heat (saunas, hammams, infrared, hot baths) can have beneficial effects on our mind and body.

These treatments can also have a positive impact on our lifestyle, which is often sedentary or hectic: the deep feeling of relaxation that regular heat treatments instil in us helps improve our general wellbeing, our ability to concentrate and our immune system response.

MY EFFE:
THE APP THAT
USES HEAT
TO REDUCE
INFLAMMATION!

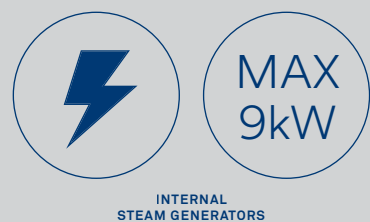

Effe has conducted extensive research into the beneficial effects of heat, based exclusively on scientific publications. The findings have been incorporated into an AI tool which gives personalised lifestyle advice and allows you to monitor low-grade chronic inflammation*: install the My Effe app and try it now!

* LOW-GRADE CHRONIC INFLAMMATION (LGCI) CAN POSE A SERIOUS RISK FOR YOUR HEALTH AND IS THE CAUSE OF MANY DISEASES

ECO— FRIENDLY

Effe's production process is designed to optimise energy consumption from start to finish. Its state-of-the-art technological solutions ensure all Effe products are long-lasting and energy-saving, their quality is certified and they require very little maintenance.

Our generators use a minimal amount of water, as the time needed to fill and drain the boiler is constantly monitored and calculated according to real need.

Our generators use a minimal amount of water, as the time needed to fill and drain the boiler is constantly monitored and calculated according to real need.

Yoku is a highly versatile modular system, ideal for both residential and public spaces. Its design is characterised by the extensive use of wood and three distinct front panel options: Shelf, Glass, and Door. The Shelf option features a customisable bookcase module that creates a visual filter between the interior and exterior spaces, fostering a more intimate and well-being-oriented experience. The Door option includes a full-height wooden door with a handle, evoking a traditional aesthetic. The Glass option offers a minimalist and luminous design, thanks to its entirely glazed front panel.

YOKU SPA SHELF

In the Shelf version, the front becomes a large open “bookcase” with steel shelving. It acts as a natural filter and holds objects, books and fabrics, creating a highly personalised look and connecting with the spa surroundings.

YOKU SPA DOOR

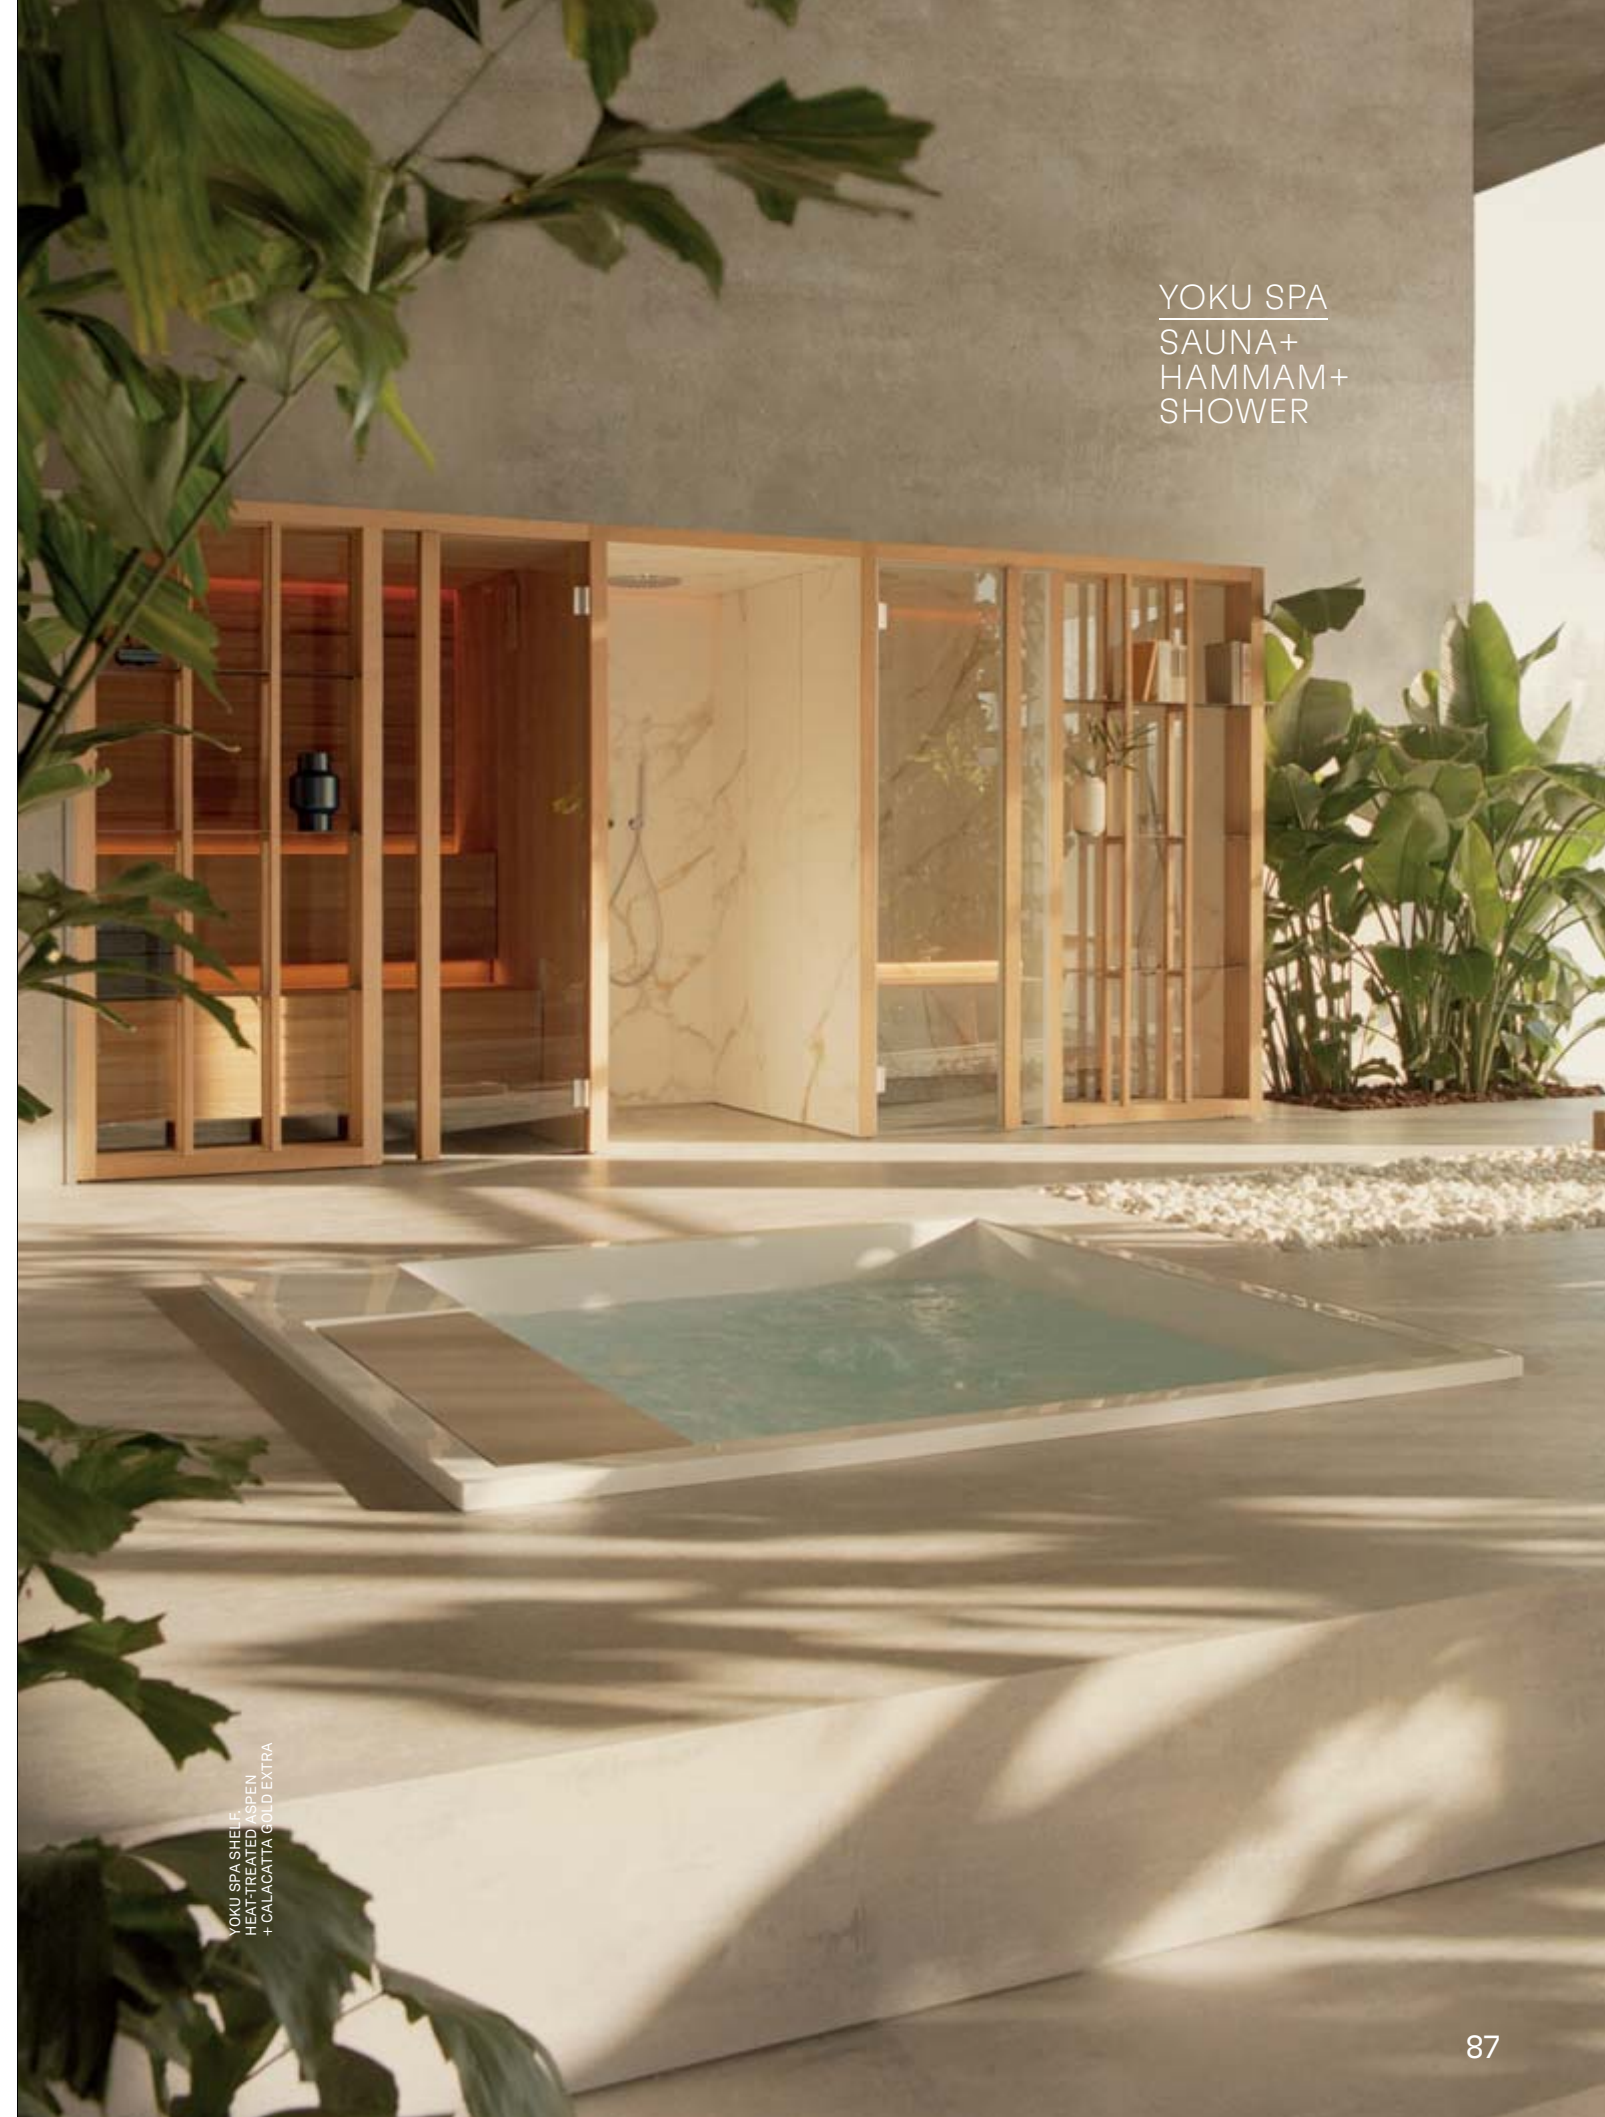

In the Door version, the large wooden door surface reflects the design of a traditional enclosed and protected sauna. The full-height handle becomes a refined and functional design feature.

YOKU SPA GLASS

The Glass version conveys a strong sense of transparency and brightness. Its clean, minimalist design highlights the product’s style details, such as the recessed glass panels framed by 7 7/8" wooden borders.

Sky and Sky Corner blur the boundaries
between the product and its surroundings:
light filters through the expansive glass
surfaces, creating a truly unique sauna
experience. Designer Giovanna Talocci has
achieved a perfect balance between tradition
and modernity, making this product highly
adaptable even for living areas, where it
becomes a rational and elegant design element.

Kanso

Design:
Alessandro Andreucci,
Christian Hoisl

The Kanso line of saunas (from the Japanese for “simplicity-purity”) is defined by its rhythmic, modular design that instils an immediate sense of tranquillity. The frames that characterise the walls create a light, harmonious aesthetic that blends seamlessly with the warmth of Aspen wood and thermally treated timbers. Crafted from natural materials employing environmentally conscious processes, Kanso is a true expression of a sustainable lifestyle.
